| Pass | Pass | Pass |  |

(1) Maximum pass, support for spades

West leads the V . What should East play?
Suppose you have decided to win trick 1 with the $\vee$ A and South follows with the $\vee$. What would you play at trick 2?

On this deal, cover the East-West cards. You are South in 4^, no East-West bidding. West leads the $\mathbb{Q}$. If East plays low, your $\downarrow$ K wins. What do you play next?

A good idea is to cash the $\boldsymbol{\wedge}$. How will you continue if (a) the $\boldsymbol{\wedge} \mathrm{K}$ drops or (b) both opponents follow, but the $\Delta$ K has not dropped?

|  | South |  |
|  | - A10754 |  |
|  | - K3 |  |
|  | - KJ7 |  |
|  | - KJ10 |  |

After winning trick 1 with the $\vee \mathrm{K}$, South plays the $\uparrow \mathrm{A}$. The $\downarrow \mathrm{K}$ singleton in either hand is your best chance of no spade loser. Crossing to dummy with a minor-suit ace and leading the Q avoids a loser only when West has the $\downarrow$ J singleton and loses a trump trick here. When the $₫ \mathrm{~K}$ drops, play to the $\uparrow \mathrm{Q}$ to draw the last trump. Then exit with a heart. Whoever wins this will give you a ruff-and-discard or lead a minor suit for you, which avoids a loser in that suit via second hand low. If all follow to the $\uparrow$, but the $\wedge$ K does not drop, you can exit with a heart or a spade. Again, whoever wins the heart trick must solve one of the minor suits for you.

East should take $\vee$ A at trick 1. With no long suit in dummy to give declarer discards, East should return a heart. If declarer then plays $\wedge \mathrm{A}$, spade to the $\wedge \mathrm{Q}, \mathrm{A}$, diamond to $\star \mathrm{J}$, West wins and should exit with the third diamond. If declarer now plays East for the Q , the result is ten tricks only. After $\vee \mathrm{A}$, heart to $\vee \mathrm{K}, \mathrm{A}$, spade to $\star$ Q, South can guarantee 11 tricks via $\star \mathrm{A}, \star \mathrm{K}$ and exiting with $\downarrow \mathrm{J}$. Whatever the defenders do now, South can avoid a club loser.

(1) Fit-showing jump

North's fit-showing jump here shows a maximum pass, support for opener's major and a strong $5+$ club suit (at least K-Q-high). West leads the $£ \mathrm{Q}$. Which spade should East play?

Suppose you have decided to win trick 1 with the $\uparrow A$ and South follows with the $\uparrow 3$. What would you play at trick 2?

|  | North <br> - 84 <br> - Q653 <br> - J9 <br> * AQ1074 |  |
| :---: | :---: | :---: |
| West |  | East |
| - QJ107 |  | - A952 |
| $\bullet 1097$ |  | $\bullet$ J |
| - AQ52 |  | - 10843 |
| * J2 |  | - 9853 |
|  | South |  |
|  | - K63 |  |
|  | $\checkmark$ AK842 |  |
|  | - K76 |  |
|  | \& K6 |  |

If East plays low at trick 1 (big mistake), South wins, draws trumps and can make 12 tricks. The same happens if East takes the A and returns a spade. South wins, draws trumps, runs the clubs, ditching three diamonds and ruffs a spade in dummy. Because of the strong club suit in dummy, East should take A and switch to a diamond. This holds declarer to ten tricks, the best you can do.

## Tomorrow's Problems:
